

Some Developments (Projects)

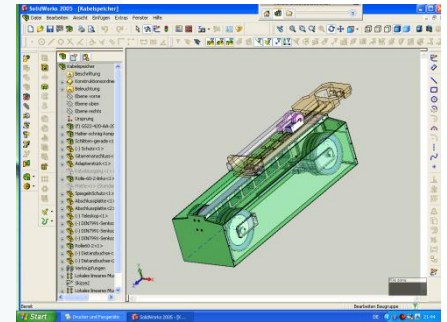

High-Speed-Inline-Galvanic

Ultra-Sonic-Device

Cable Storage

US-Shuttle

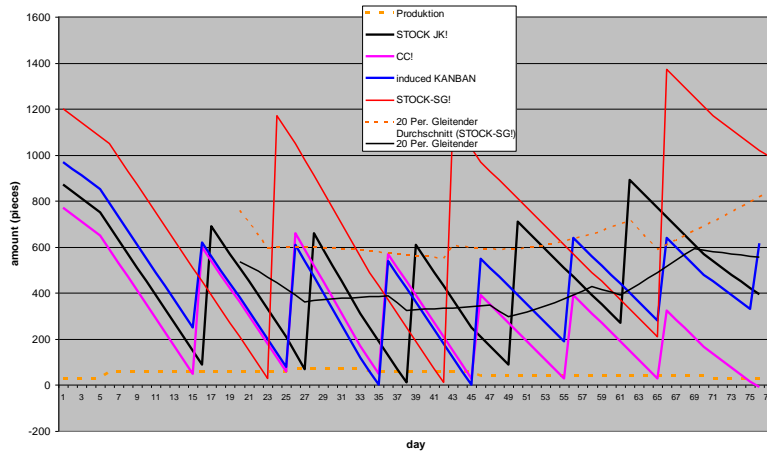

Chip Fixing for Soccer Ball Planned for Soccer-World Championship 2006

REORGANISATION OF ASSEMBLY ITW- *CRONES* Ansbach

MRD- induced supply chain management for KANBAN -Production

possible workload scenario in 2005 quartal outlook

2-LAYER-KANBAN-STOCK
80/20
Compact and flexible
JUST IN TIME Assembling

Management Task „Renovation“

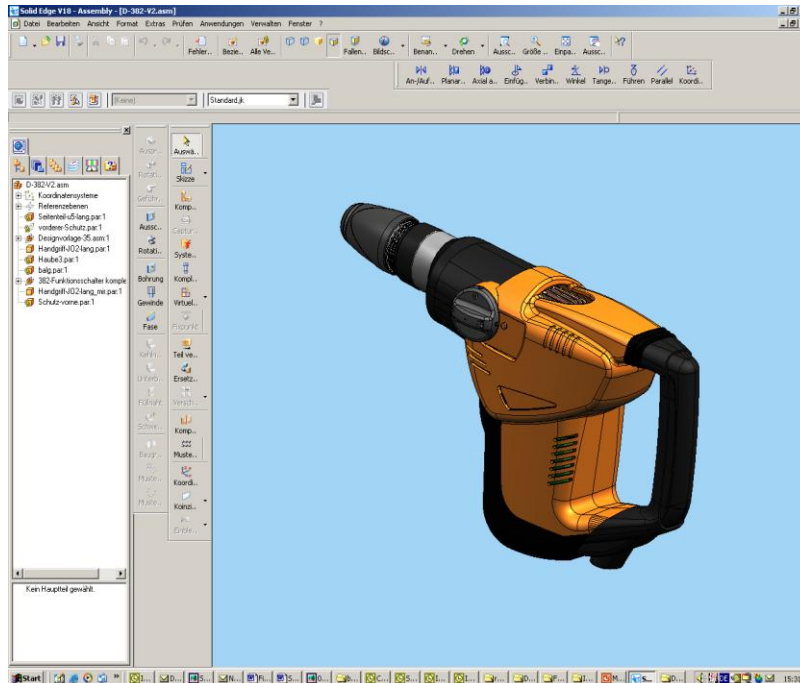

- Evaluating a Support Construction together with external Engineers
- Projectmanagement together with the Unit-Manager
- Responsible for electrical Energy Supply (Planning, Installation, Controlling)

Development of Electro Power Tools

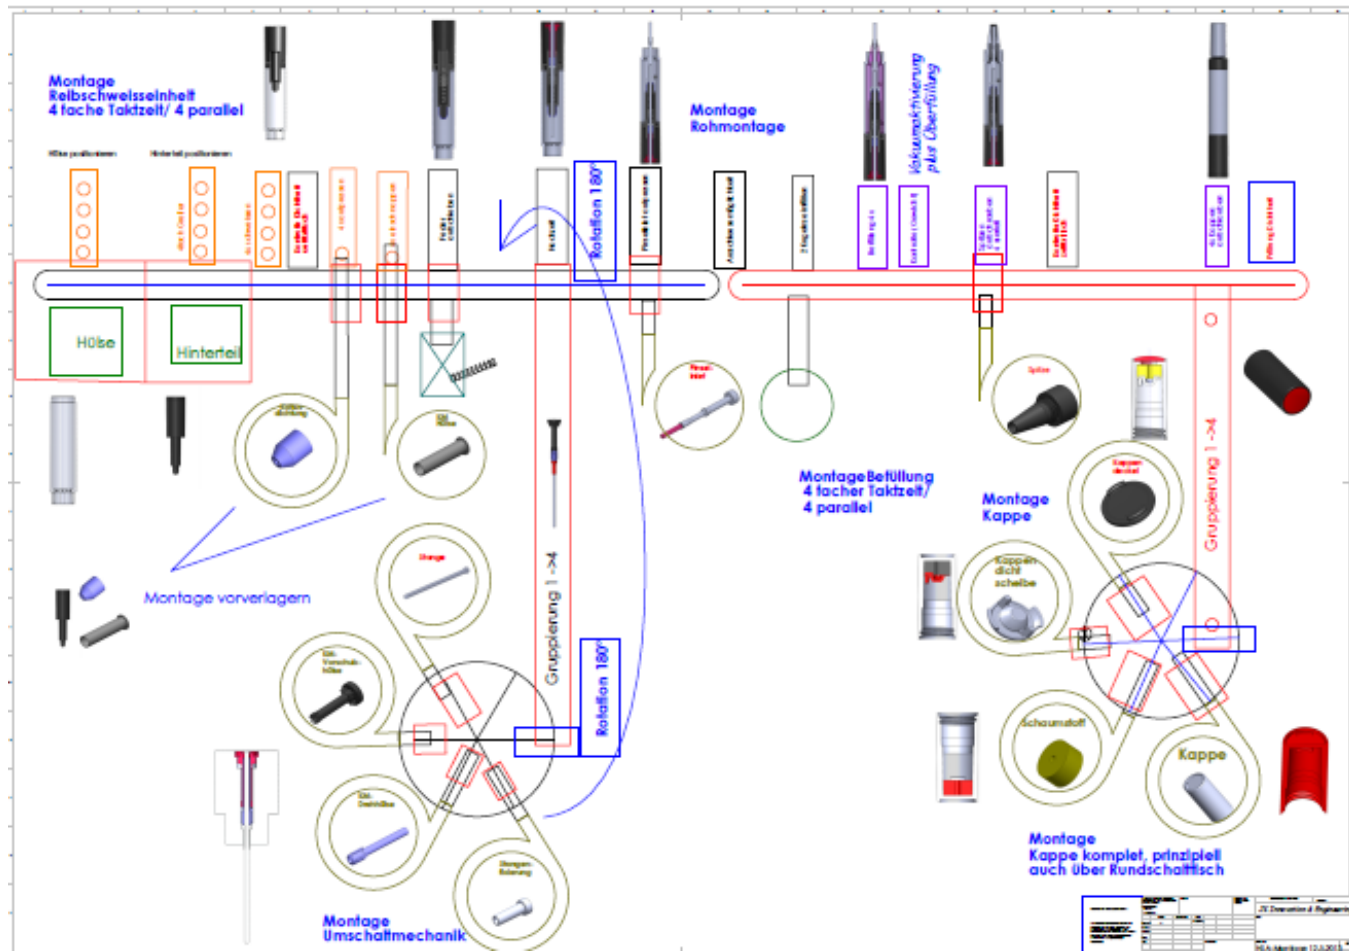

Designing the plastic Parts of a a new
8kg Hammer and 5 kg Hammer

SRC-Electronic Feature to
improve the Safety

Concept - scalable Assembly Line

Target: minimum Production Costs according to Sales Forecast

Hybrid Prototyping / DLP-Printing

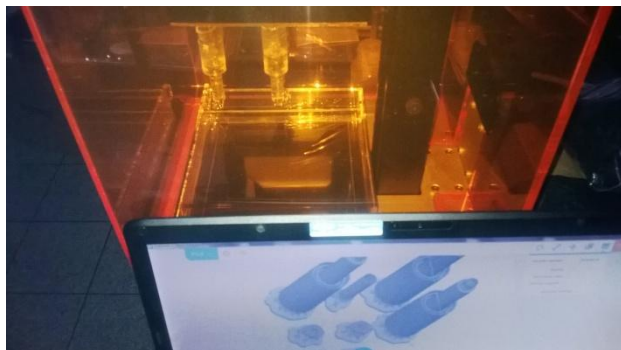

Pre-Serial Product for Cosmetic Industry

Hybrid-Prototype (with 3D printed parts)

3D Printing

First Prototype of a new HH-Generator
